Jeff,  
Thanks for forwarding this; traditional knowledge is the lens of  
sustainability and will become increasingly important to aid agency  
decision-making. I hope you are coping as well as possible with the terrible  
heat in D.C.  
Alan

FYI..... I thought this might be of interest to those involved in traditional  
ecological knowledge....

Hello Brendan -

At the last IARPC Principles meeting I mentioned that the next issue of our  
quarterly publication, Ocean Science, was dedicated to traditional knowledge  
and how it is incorporated into BOEM decisions and documents (such as EAs and  
EISs). That issue is now available and I wonder if you might drop a note to  
the IARPC Principles for me as several folks seemed to be interested. The PDF  
is linked from here  
<http://boem.gov/BOEM-Newsroom/Library/Ocean-Science/Ocean-Science.aspx> and  
hardcopies will be available shortly. I will bring copies to the next  
Principles meeting.

Best -

Alan
